

List of Services offered by Xpanz

Selection of technically sustainable solar equipments

We ensure it through analysis of new products on various parameters, like high efficiency, reliability, low light response, safety / protection features, like Zero feed-in, IP66, Product & Performance Warranty, IEC Certifications. Transparency in selection is also ensured, as we are not representing any particular company / brand.

Clean Energy Council

World's Best Quality Certificates

Assessment of the capacity of proposed solar power plant

We do it through analysis of electricity bills, transformer's capacity. We also measure to ensure availability of Sufficient Shadow-free Space (SSS).

Wind Analysis

We design the structure to sustain the wind flow of 150 kmph.

Shadow Analysis

We do it for all the 12 months & each hour of "Solar Window".

Prompt After Sale Service

A dedicated technical support team (TST) ensures the prompt after sale service with a guarantee to address the service call within 24 hrs. alongwith O&M Manual, logistic systems, like O&M Van, Stocking of critical equipment, etc.

Standard Operating Procedures (SOP's)

Feedback Systems

Well Designed & Operational IT Systems

Complaint Reddressal System (CRS)

Performance Analysis Track Report (PATR)
